

HURRICANE SAFETY

♥ I can help keep my family safe! ♥

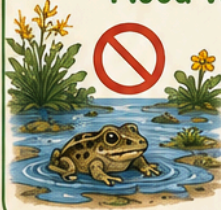

The Gopher Tortoise family opens their burrow to help friends in the Florida scrub habitat. Together, we stay safe.

1 Check for Danger

Look for downed power lines, broken glass, and sharp objects.

2 Stay Out of Flood Water

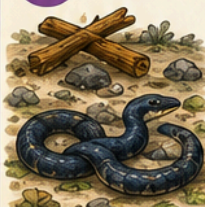

It can be deep, dirty, and unsafe. Turn around, don't drown!

3 Listen to Grown-Ups

They will tell you what is safe and what to do.

4 Watch Your Steps

Look where you walk. There may be hidden hazards.

5 Help Your Family and Friends

Help clean up light debris with a grown-up. Teamwork helps our community!

6 Check on Animals

Make sure pets and wildlife have food, water, and a safe place to stay.

7 Use Flashlights, Not Candles

Flashlights are safer. Candles can start fires.

8 Be Patient

It's okay if things look different. We heal together.

9 Share Kindness

A kind word or a helping hand makes our community stronger.

YOU ARE A HURRICANE HELPER!

You can help your family, your friends, and our Florida nature stay safe.

Just like the Gopher Tortoise family, we take care of each other.

OUR SCRUB HABITAT IS OUR HOME.

We are strong. We are safe. Together, we can get through anything!
